Skills

- **Languages:** JavaScript, C, Python, Java
- **Frontend:** React.js, Tailwind CSS, HTML5, CSS3, Vite
- **Blockchain & Web3:** Ethers.js, RainbowKit, Base Sepolia Testnet (Onchainkit)
- **Tools & Libraries:** Git, GitHub, Vercel, Render

Project Work

- **CareerCompass – AI-Powered Career Guidance Platform**
Developed a responsive and engaging web application offering personalized career guidance using Gemini AI. Integrated Firebase Authentication for secure user access and Firestore for real-time data storage and user tracking. The platform features interactive dynamic roadmaps across multiple career domains, curated lists of internships, workshops, and events, along with a community engagement system. Deployed the frontend via Firebase Hosting and backend services through Render, ensuring a smooth and scalable experience across devices.
- **ZenCue – Neurodivergent-Friendly Productivity Tool**
Developed a neurodivergent-friendly productivity app using GROQ APIs to offer AI-driven explanations through text, images, and voice. Integrated screen-capture and image upload features using html2canvas and Imgur, enabling users to get contextual understanding from visuals. Built using React, Flask, and Tailwind CSS, the platform featured calm UI animations, voice feedback, and responsive design to create a soothing, distraction-free experience tailored for neurodiverse users.
- **TrustBridge – Decentralized P2P Lending Platform**
Built a secure web app enabling direct connections between borrowers and lenders using Sepolia testnet. Integrated wallet-based login, loan management, and dynamic trust score generation from uploaded financial/KYC documents. Implemented Firebase for user authentication, document storage, and verification. Developed with React (Vite) and Flask, designed for seamless prototype use in academic and fintech innovation settings.

Education

Dr. BC. Roy Engineering College

August 2023 - pursuing

B TECH in Computer Science and Engineering

Relevant Coursework: Object Oriented Programming, Databases, Discrete Math's, Data Structures and Algorithms, Computer Network, Python.

Awards and Certificates

- **HackHazards 2025 – The Namespace Community**
Participated as part of *Team The Eaglites* in one of the world's largest independent community hackathons focused on AI, Web3, and Infra, held from April 11–27, 2025.
- **NSHM x OSSDC – Code for Change 24-Hour Hackathon (March 2025)**
Successfully participated in a 24-hour hackathon held on March 21, 2025, at NSHM Knowledge Campus. Demonstrated creativity, teamwork, and strong problem-solving skills while developing real-world solutions.
- **JGEC Winter of Code 2025 (Open Source Contribution Program)**
Contributed as a **mentee** in multiple open-source projects from February 10 to March 10, 2025. Actively collaborated with maintainers and learned open-source workflows and project structures.
